## Piercing Tools

(need to run 300,000 – 400,000 RPM)

Check with your dentist they may have some old hand pieces laying around that they will give you.

Turbo Carver -- [www.turbocarver.com](http://www.turbocarver.com)

NSK (pencil style) – I have not found them cheaper than for what Binh Pho sells them. -- [www.angelfire.com/il2/binhpho](http://www.angelfire.com/il2/binhpho)

## Burs for Piercing

I have found carbide tapered burs work best. Again check with your dentist. Burs that are not sharp enough for them are fine for wood. Take what they will give you. Diamond burs are good for smoothing if needed.

I use a 699L for the most part.

Atlanta Dental Supply --
